Just start typing...

- LAPS
- Entra Internet access
- M365 Backup
- Sentinel KQL queries

Loop Workspace

The screenshot displays the Loop Workspace application interface. On the left is a dark sidebar with the 'Loop' logo and a 'Preview' button at the top. Below are navigation options: 'Recent' with a clock icon, 'Ideas' with a notepad icon, and a workspace section for 'Techwerks 20' (1 Workspace member) with a menu icon and a plus button. The workspace contains three items: 'About', 'Agenda' (which is selected and highlighted with a vertical bar and a globe icon), and 'Attendees'. The main area on the right has a top bar with an 'Agenda' dropdown, a globe icon, a share icon, a 'Share' button with a dropdown arrow, and a more options menu. The main content area is titled 'Agenda' in large white text. Below the title is a rounded rectangle containing the word 'Topics' with a small profile icon at the top left. At the bottom of the main area is a bulleted list of topics: 'LAPS', 'Entra Internet access', 'M365 Backup', and 'Sentinel KQL queries'. A small grid icon is to the left of the list, and a speech bubble icon is at the bottom left of the main area.

Tell me more about how to Microsoft Loop

Sure, I'd be happy to tell you more about Microsoft Loop!

Microsoft Loop is a transformative co-creation experience that brings together teams, content, and tasks across your tools and devices. It combines a powerful and flexible canvas with portable components that move freely and stay in sync across applications, enabling teams to think, plan, and create together ¹.

Here are some key features of Microsoft Loop:

- **Loop components** are portable pieces of content that stay in sync across all the places they are shared. They allow you to collaborate in the flow of work, whether on a Loop page, in a chat, email, meeting, or document. These components can be lists, tables, notes, and more ¹.
- **Loop pages** are flexible canvases in the Loop app where you can bring together people and all your components, links, tasks, and data. Loop pages can start small and grow to match the size of your ideas. They can be shared across Microsoft 365 apps as a link or as an embedded Loop component ¹.
- **Loop workspaces** are shared spaces that allow you and your team to see and group everything important to your project, making it easy to catch up on what everyone is working on and track progress toward shared goals ¹.

To get started with Microsoft Loop, you can visit the Loop home page and start with a template. Loop components are currently supported in Microsoft Teams, Outlook, Word for the web, and Whiteboard ¹.

If you have any specific questions or need further details, feel free to ask!

Storage locations

- OneDrive for Business
- Loop pages are actually in a hidden SharePoint site called "Loop Data Site"
- The Loop Data Site contains the data and files associated with all of the Loop Workspaces in your organization, including the Workspace Pages, conversations, files, and other content.

Take aways

- Loop is yet another way to collaborate
- Administration and compliance challenges
- Adds to confusion of when to use what for users
- Is quick and easy to use when you get there
- Copilot pages are Loop pages
- Loop components can be embedded into just about any Microsoft application
- External sharing is supported with Entra ID B2B users
